Fleet management software you can trust

FleetCheck believes that everybody has the right to be safe on the roads.

Our business was created in 2006 so that we could improve the safety of drivers, vehicles and the public by providing education and solutions that lower the cost of compliance for fleet managers.

We are working for a time when everyone responsible for vehicle fleets is using appropriate tools and solutions. Our part in achieving this is for us to help remove barriers to fleet management by providing simple, easy to use and cost-effective software and solutions.

When FleetCheck started in 2006, our motivation was to make life easier for the thousands of people responsible for running their firm's vehicles. Many of them didn't even think of themselves as fleet managers because managing the vehicles wasn't the only role they had in the business and they were simply trying to do the best they could, with limited resource and experience.

Spreadsheets are normally the go-to tool for those managing vehicles and their drivers. There's no extra cost as the software is already in use throughout the business and little training is needed as it's simple and intuitive to use.

However, the potential for problems grows along with the business. Putting more data into ever-more complex spreadsheets can lead to a variety of data problems that are difficult to undo. Lost data, inconsistent formatting and numbers that don't add up can be difficult, if not impossible, to troubleshoot. Key dates such as MOT, road tax, servicing and driver checks can all get missed.

Chasing paperwork from drivers for daily vehicle checks is another common bugbear. It's hugely time-consuming, some records don't get filed, they have to be sorted manually to identify faults, and further time-consuming processes are required to manage any repairs.

Fleet management software eliminates the problems associated with spreadsheets, providing a secure online platform for multiple users, unlimited document storage for MOTs, insurance policies vehicle check sheets and accident records. It can integrate with your other data such driver licence checks, fuel card data and telematics systems, and provide a much more comprehensive range of formats for reporting on your fleet activity.

At FleetCheck, we work with businesses and organisations as a trusted partner. By eliminating paper-chasing and manual processing, our software helps them save time, save money, and enjoy peace of mind that their compliance requirements are being met.

In recognition of our third consecutive Fleet News 'Reader Recommended' award, we'd like to offer 100 Fleet News readers the chance to use our new FleetCheck DriverLite paperless vehicle checking app for free. This isn't a trial – it's a product you can use long-term with no limit on the number of drivers and vehicles you can add*. Go to www.fleetcheck.co.uk/driverlite to register.
